PROFESSIONAL SUMMARY

AI Engineer Intern and Computer Science undergraduate developing Python backend services, REST APIs, integrations and tested software systems. Experienced with FastAPI, Docker, automated testing and AI-assisted workflows, with an emphasis on reliable behaviour, edge-case handling and clear documentation.

EXPERIENCE

AI Engineer Intern — BitApps *Backend integrations, automation & quality* April 2026 – Present

- Contribute to backend integration workflows using Python, FastAPI, REST APIs and webhooks within AI-assisted software development tasks.
- Configure and run Docker-based services for local development, integration testing and debugging across connected application components.
- Develop Playwright and pytest feature tests to validate frontend behaviour, APIs, authentication flows and feature-level requirements.
- Diagnose unreachable services, incorrect responses, environment issues and edge-case failures; document findings and troubleshooting steps.

SELECTED BACKEND & SOFTWARE PROJECTS

Smart Risk AI Python · FastAPI · scikit-learn · API Integration

- Built a FastAPI service for project-risk prediction using a Random Forest model, feature engineering, cross-validation and model evaluation, with an interactive interface for submitting data and reviewing results.

ClinicalMind — AI Diagnostic Support Co-Pilot (In Development) Python · FastAPI · RAG · Docker

- Implementing an agent-based clinical support workflow for text, voice and image inputs, with a FastAPI backend and retrieval-grounded guidance; designed as a support tool requiring qualified medical review.

CodeEval — AI-Generated Code Evaluation Suite Python · AST · pytest · Test Automation

- Developed a structured evaluation service using automated tests and AST-based analysis to assess generated code for correctness, efficiency, readability and edge-case coverage.

TrafficIQ — Smart Traffic Management System Python · Pandas · XGBoost · Streamlit

- Developed Python data pipelines for traffic sensor records, including outlier handling, normalisation and time-based feature extraction, with forecasting models and a Streamlit interface for traffic insights.

TECHNICAL SKILLS

Language	Python
Backend	FastAPI, REST APIs, API Integrations, Webhooks, Authentication Flows, Async Workflows, Service Debugging
Data & AI	Pandas, NumPy, scikit-learn, XGBoost, PyTorch, RAG Pipelines, LlamaIndex, Pinecone, Streamlit
Testing & DevOps	Playwright, pytest, Unit Testing, Integration Testing, API Testing, Postman, Docker, Docker Compose, Git, GitHub, MLflow

EDUCATION & ACHIEVEMENTS

B.Tech, Computer Science and Engineering — SRM Institute of Science and Technology, Sep 2023 – May 2027
Tiruchirappalli · CGPA: 8.17

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering · Critical Mass, IIT Patna Apeiron Fest 2026 — Official submission, 30/30 benchmark record
